

## **Project Deliverable 11: Project Presentation**

---

At this point, you have completed all project deliverables and have prepared PPT presentations for each deliverable. Here, you will integrate your deliverables into a final project PPT presentation. Your presentation must be 20 minutes max, with a 5 minute Q&A.

Prepare your deliverable as a PowerPoint presentation that you will present to the class on the deliverable due date. Upload your presentation to the appropriate D2L discussion forum by 5:00 PM on the due date. Presentations submitted late will have ½ grade point subtracted for each team member.

Presentations will be given on the last scheduled class period. It is strongly recommended that teams arrange for attendance by representatives of their project sponsor. In addition, students are encouraged to invite, friends, family, co-workers, supervisors, etc. The instructor will provide beverages, and students are encouraged to bring light snacks.

Your project presentation will be [assessed](#) by your peers using a survey tool provided by your instructor. Students who have not submitted peer assessments by the assessment due date will have ½ grade point subtracted from their grade. Results will be provided to all teams the day after completion of the peer assessments. All individual survey responses will be strictly confidential, but anonymous comments will be shared with the class.
